GI

AB The title photoreceptor comprises an elec. conductive support with a coating of a photosensitive layer contg. a fluoranthene deriv. I [R = H, halo, (substituted) alkyl, alkoxy, or NH₂; R₁, R₂ = (substituted) alkyl, aralkyl, aryl, or heterocycle, R₁ and R₂ may form a 5- or 6-membered ring together with the N atom.]. The photoreceptor is easy to prep., shows good photosensitivity and durability in continuously repeated use. Thus, an Al substrate was coated with a charge-generating layer contg. a disazo pigment and with a charge-transporting layer contg. II to give a photoreceptor.

ST electrophotog photoreceptor charge transporting agent; fluoranthene amine electrophotog photoreceptor
